# Random Integer Generator

This form allows you to generate random integers. The randomness comes from atmospheric noise, which for many purposes is better than the pseudo-random number algorithms typically used in computer programs.

## Part 1: The Integers

Generate  random integers (maximum 10,000).

Each integer should have a value between  and  (both inclusive; limits  $\pm 1,000,000,000$ ).

Format in  column(s).

## Part 2: Go!

Be patient! It may take a little while to generate your numbers...

Note: The numbers generated with this form will be picked independently of each other (like rolls of a die) and may therefore contain duplicates. There is also the [Sequence Generator](#), which generates randomized sequences (like raffle tickets drawn from a hat) and where each number can only occur once.
